

The Burden of Disease due to COVID-19:  
Towards a harmonization of population  
health metrics for the surveillance of  
dynamic outbreaks.

Milicevic, Natalya Glushkova, Kairat Davletov, Alexander Rommel

European Burden of Disease Network, 3rd WG Meeting, 26.01.2022

# BoCO-19 Project Aims

## Overall aim

- To harmonize BoD methodology for pandemic monitoring and the surveillance of dynamic outbreaks, using COVID-19 as an example

## Specific objectives

- Development of a harmonized methodology
- Implementation of BoD indicators
- Dissemination of methodology and results

# Main features

## ➤ Scientific network and platform

- The project enables scientific networking and methodological exchange
- Funded by German MoH - Global Health Protection Programme  
[www.ghpp.de](http://www.ghpp.de), <https://ghpp.de/en/projects/boco-19/>
- Project Coordination: **Germany** (Robert Koch Institute)
- Coordination support: **Serbia** (University of Belgrade), **Kazakhstan** (Al-Farabi Kazakhs National University)
- Project is also supported by **Burden-EU COST Action**, and **WHO Regional and Country offices**

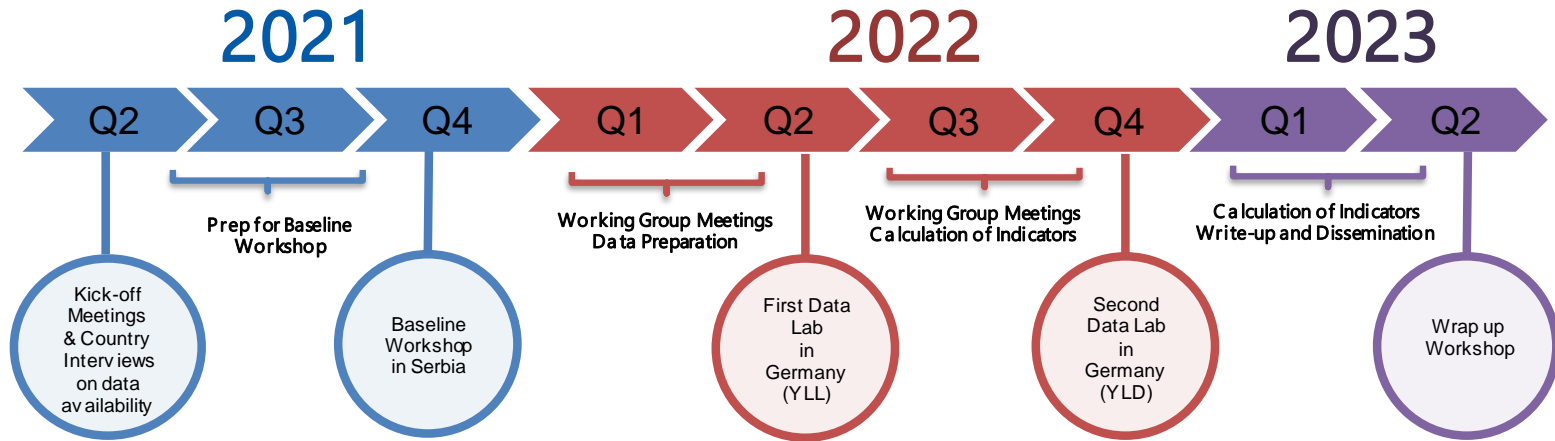

# Project Partners

- 7 partners in South-East Europe
- 7 partners in Caucasus/Central Asia
- Project duration: 1 May 2021 – 30 April 2023

Coordinator - GERMANY	
Partners	
South-East Europe	Southern Caucasus / Central Asia
<ol style="list-style-type: none"><li>1. Serbia</li><li>2. Albania</li><li>3. Bosnia and Herzegovina (2 partners)</li><li>4. Kosovo</li><li>5. Montenegro</li><li>6. Turkey</li></ol>	<ol style="list-style-type: none"><li>1. Kazakhstan</li><li>2. Azerbaijan</li><li>3. Georgia</li><li>4. Kyrgyzstan</li><li>5. Mongolia</li><li>6. Ukraine</li><li>7. Uzbekistan</li></ol>

# BoCO-19 timeline

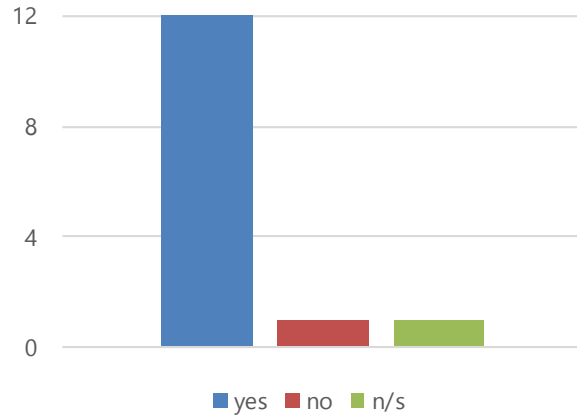

# WP1: Project Kick-off and Preparation

- Discussion of project aims and goals
- Introduction to BoD concepts
- Individual country interviews (data availability, data quality and limitations)
- Preparation for Baseline Workshop

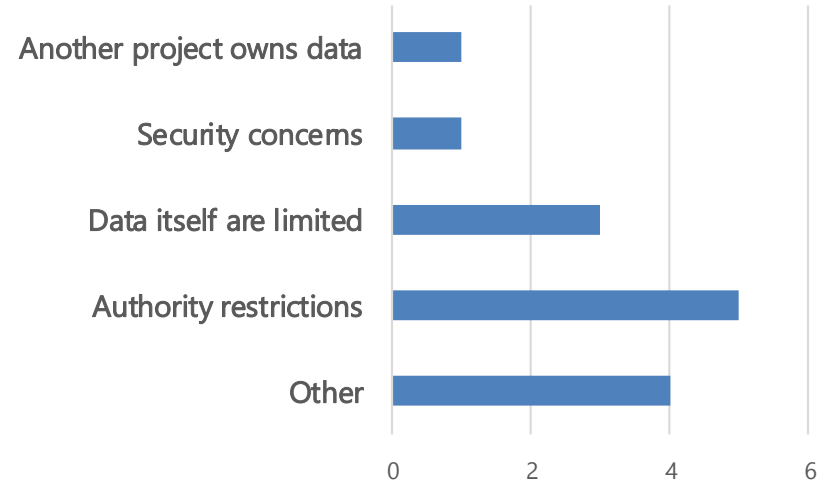

# Data availability

## COVID-19 data at least partially available

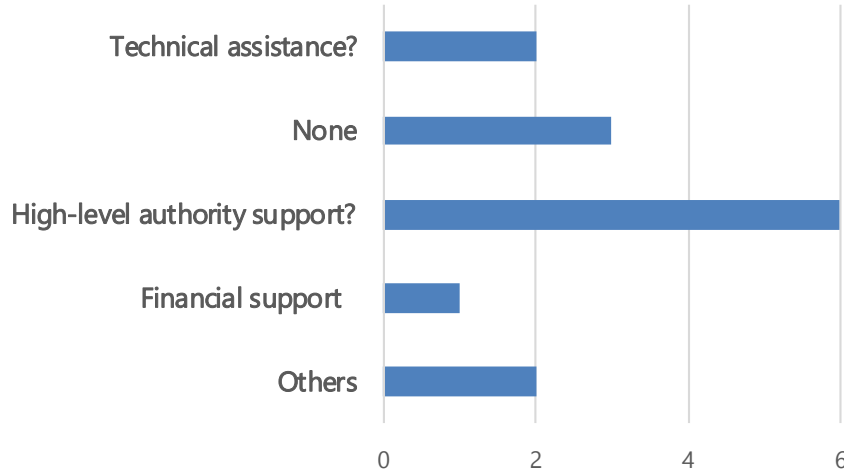

## If data not accessible or only partially accessible – reasons for this

# Data availability

What support is needed to get access to data?

How long approx. needed to get access to data?

- BoD training (general concepts, burden of COVID-19)
- Creation of three Working Groups:
  - i) **Data WG:** Preparation and collection of data
  - ii) **Methods WG:** Methodological challenges and solutions
  - iii) **Writing group:** Discussion of potential publications and communication/dissemination

## WP2: Methods

- Life Expectancy tables – GBD and possibly also a regional aspirational LE table
- Standard Population – GBD World Standard Population
- Underestimation of COVID-19 deaths and Excess Mortality
- Choice of disease model and input parameters

## Key messages

- Timely information on the impact of COVID-19 on population health is needed, with methods which allow for international comparability
- BoCO-19 establishes a network of international partners and provides support and capacity building for calculation of the burden of COVID-19.

**Благодарю!**  
*Rahmet!*  
Thank you  
Дякую!  
*rahmat!* *Hvala!*  
Баярлала!

*faleminderit!* *teşekkürler!*
